

Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

What is the best portable power supply?

After carefully researching all of the different options on the market today, we have concluded that the SUAOKI Portable Power Station is by far the best portable power supply out there. It comes with a multitude of charging ports and options, which means that if you have a device that needs to be charged, this unit will have you covered.

How to choose a portable power supply?

Now, there is a lot to take into consideration when you are looking for a portable power supply. The battery type and battery capacity will determine how long your supply will run and how much it can charge. You also have to take into account for what type of wattage the supply is rated, since this will help to determine what you can power with it.

Should you get a power supply with a variety of plug-in options?

If, however, you want to make things a bit easier on yourself, then it might not be a bad idea to get a power supply with a variety of plug-in options. This would include USB plugs, as well as DC ports. That way, you are covered, no matter what you need to plug in and charge.

A good portable power station will keep you off the plug for days or even weeks at a time. We've tested the latest, including Anker, Goal Zero, and more.
