

In this video, we'll show you how to create two fantastic projects: a Wind Power Generator Model and an RC Robot, all using recyclable materials.

I'm interested in building some small scale wind turbines using RC motors as the generator.

For the last couple of months I have been working on assembling a Wind RC Rafale scale turbine. I picked up this airframe, along with a Wind RC Viper, late last year from Chief Aircraft.

With this kit, you can assemble a realistic wind turbine complete with electric generator and adjustable rotor blades that are designed with complex aerodynamic curves to look and work like modern-day ...

Today, we're diving into an incredible DIY project--creating a wind-powered car using a simple DC motor and propeller! This eco-friendly vehicle is powered by the force of wind alone, making...

These kits vary in design, power output, and intended use--from educational STEM experiments to home and outdoor applications. Below is a summary of some of the best products to ...

With this kit, you can assemble a realistic wind turbine complete with an electric generator and adjustable rotor blades that are designed with complex aerodynamic curves to look and work like modern-day wind turbine ...

Walthers Northern Light & Power Substation Kit HO Scale Model Railroad Building Kit.

As for the pulleys, I am still waiting for the motor that I am going to use as a generator, I have not done the tests yet but I leave you the links of the ones that I am going to use.
