

The largest energy storage system in Italy, based on batteries from electric vehicles, was inaugurated at Rome's Fiumicino Airport on Tuesday to reduce carbon emissions.

Enel's Pioneer project is expected to last 10 to 15 years and has been integrated with Rome-Fiumicino airport's Solar Farm, self-consumption PV system. Italy's largest second-life battery ...

Italy's largest second-life battery energy storage system was officially launched at Rome-Fiumicino airport yesterday. State-owned gas and electric company Enel's 2.5 MW/10 MWh Pioneer...

The inauguration of the largest energy storage facility using second-life batteries in Italy marks a turning point in the decarbonization of the Fiumicino airport hub.

84 Nissan LEAF batteries reconditioned and used to supply 2.1 MWh of energy storage to Enel's large-scale pioneering system. Coupled with the solar farm, the system is expected to ...

The storage system accumulates renewable energy to be used even when the sun is not out, and leverages used electric vehicle batteries, giving them a second life.

Europe's largest airport solar-battery integration, boosting energy resilience and circular economy leadership. Rome's Fiumicino International Airport has launched Pioneer, Europe's largest ...

Enel: Italy launches an innovative energy storage system at Rome's Fiumicino airport, utilizing old electric vehicle batteries to significantly reduce carbon emissions and store renewable ...

As global energy demands soar, the Rome Star Energy Storage Project emerges as a game-changer in renewable energy integration. This article explores how this 200MW/800MWh facility redefines grid ...

Elgin is targeting a 3GW+ development pipeline in Italy by 2030, with a strong focus on co-located Agri-PV and Battery Energy Storage Systems (BESS) in addition to traditional solar and ...
