

As of June 30, 2025, total solar electric generating capacity in Brazil was 23% of the total electric generating capacity. Home and building owners installed more than 3.7 million renewable ...

This impressive feat places Brazil at the forefront of the clean energy transition within the G20, demonstrating how rapid growth in renewables can significantly reduce emissions while ...

Brazil has rapidly consolidated its position as one of the world's renewable energy powerhouses, driven by an extraordinary boom in solar generation.

Overview Electricity Total energy matrix and Electric energy matrix Ethanol fuel Biomass External funding Hydroelectric power plants produced almost 80% of the electrical energy consumed in Brazil (now 60%). Brazil has the third highest potential for hydroelectricity, following Russia and China. At the end of 2021 Brazil was the second country in the world in terms of installed hydroelectric power (109.4 GW). The Itaipu Dam is the world's second largest hydroelectric power station by installed c...

Brazil is the largest electricity market in Latin America, the world's seventh-largest consumer electricity market, and has the third largest renewable energy generation capacity in the ...

Brazil's largest source of clean electricity is hydro (56%). Its share of wind and solar (24%) is above the global average (15%) - higher than some regional peers such as Argentina ...

Brazil is one of the leading renewable energy producers worldwide. In 2024, the Latin American country ranked third in terms of installed renewable capacity, only after China and the ...

Renewable sources supplied 88.2% of Brazil's electricity demand in 2024, with wind and solar covering 24% of the total, according to state energy agency EPE. The data comes from the ...

Brazil's Ministry of Mines and Energy confirmed the nation's electricity grid now draws 85% of its capacity from renewable sources, fueled by a record 10.9 gigawatts (GW) of new solar and ...

As of 2018, renewable energy accounted for 79% of the domestically produced electricity used in Brazil. [1][2][3] Brazil relies on hydroelectricity for 65% of its electricity, [1][2] and the Brazilian government ...

Access to electricity across the country is almost universal and renewables meet almost 45% of primary energy demand, making Brazil's energy sector one of the leas.
