

The energy strategy of Russia aims to maximize the use of domestic energy sources and realise the potential of the energy sector to sustain economic growth. The Strategy also aims to ...

A "massive attack" by Russian forces on Ukraine's energy infrastructure has caused power outages across the country, the state grid operator said on Saturday.

Millions of Ukrainians are preparing for another winter of blackouts as Russia renews its strikes on the country's energy grid.

Estonia, along with fellow Baltic states Latvia and Lithuania, is preparing finally to rid itself of one of the last vestiges of Soviet occupation: an electricity grid controlled by Russia.

Russian strikes target energy infrastructure across Ukraine, knocking out power, damaging power plants and deepening winter hardship. Meanwhile, Trump wants the war to end by June, Zelenskyy says.

Sixteen power lines that used to connect the three Baltic states with Russia and Belarus were dismantled over the years as a new grid linking them with the rest of the EU was created,...

Russia's mammoth power sector, which includes over 440 thermal and hydropower plants, plus 30 nuclear reactors, has a total electric generation capacity of 203 gigawatts (GW).

The electric power system of Russia consists of the Unified Energy System of Russia (UES of Russia) and five technologically isolated territorial power systems (TITPS).

Russia has a single synchronous electrical grid encompassing much of the country. The Russian electric grid links over 3,200,000 kilometres (2,000,000 mi) of power lines, 150,000 kilometres (93,000 mi) of ...

A brutal Arctic cold snap has pushed parts of Russia's regional power grid past the breaking point, plunging northern cities into darkness and exposing how fragile Soviet-era infrastructure has ...
