

Sofia 2025 Energy Storage Project Signed on July 28, 2025, in Sofia, the deal marks a major step in energy transition for Southeastern Europe, combining SUNOTEC's expertise in solar infrastructure ...

The agreement will allow AES Bulgaria to explore options for the development of a 100-MW solar-plus-storage facility and an 80-MWh standalone battery energy storage system (BESS) in the region of ...

That's where the Sofia Energy Storage Projects come in - they're basically the Swiss Army knives of the renewable energy world. These grid-scale battery systems are solving one of the ...

This article establishes a full life cycle cost and benefit model for independent energy storage power stations based on relevant policies, current status of the power system, and trading rules of the ...

Coupled with energy storage, the solar power assets will provide clean energy during non-daylight hours, grid stability, and facilitate further integration of solar power in the country's energy mix.

This article provides a comprehensive guide on battery storage power station (also known as energy storage power stations). These facilities play a crucial role in modern power grids by ...

Specializing in lithium-ion and flow battery systems, this manufacturer addresses critical needs across multiple sectors from renewable energy stabilization to industrial power management.

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, ...

IPS, a Sofia-based manufacturer of power conversion technologies and turnkey energy storage solutions, expects to reach 5 GWh of annual battery production capacity at its new site within ...

IPS has officially opened its new battery energy storage system (BESS) manufacturing facility near Sofia, Bulgaria - a site recognized by the European Commission as a Strategic Project ...
