

Solar container communication station box-type substation equipment

Medium voltage containerised power substations for the solar, mining, tunnelling and construction industries. Containers substation are offered as standard or bespoke packages to suit the client's ...

Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested at the factory, allowing easy transport and fast installation and ...

All equipment is pre-assembled and tested in the factory, requiring only on-site positioning and cable connections, reducing construction time to 5-8 days and significantly cutting installation costs.

Our ehouses and kiosks are compact substation modules that are designed to reduce shipping and transportation costs, and speed the uptake of renewables around the world. Combining them with ...

Ideal for urban grids, industrial zones, and renewable energy fields. Designed for 11kV to 33kV networks, these substations support both oil-immersed and dry-type transformers, and are compatible with SF6 ...

By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level ...

HUAQUAN box-type substations integrate high-voltage switchgear, distribution transformers, and low-voltage distribution equipment into a single enclosure, achieving modular design, flexible ...

It is used in scenarios such as communication base stations, smart cities, transportation, power systems and other edge sites to provide stable power supply and optical distribution networks.

View our prefabricated container substation product, which allows for mobility and rapid deployment. Join META Power Solutions online to learn more or contact us today to request a quote.

The prefabricated box type substation (compact substation/package substation) is manufactured by Rockwell Electric in China. It meets IEC1330 standard and IP3X protection grade.

All traction power and switching equipment in one container
Medium-voltage switchgear
Rectifier transformer unit
DC switchgear
Setup, connect, switch on - ready
Digital components, connectivity and digital solutions
Station control
Technical features station control system
Sitras SCSEnergy management system
Benefits
Asset Monitoring
Cloud Connectivity
The three-phase AC supply is fed in and distributed via the medium-voltage switchgear. The rectifier transformer unit (rectifier transformer and rectifier Sitras REC) transforms the voltage and frequency of the power supply. DC switchgear Sitras DSG or Sitras CSG
