

One of the Vatican's most notable initiatives is the expansion of solar energy systems across key locations, including the entrance to the Vatican Museums and the Vignaccia area.

By reducing its reliance on non-renewable energy sources, Vatican City significantly decreases its carbon emissions. The solar initiatives contribute to cleaner air and set a powerful example for ...

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican...

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside...

Italian energy company ACEA completed the project in just six months, installing photovoltaic panels on Vatican-owned property outside Rome. The solar array generates enough ...

Before his death, Pope Francis fulfilled his green energy vision with a massive solar installation that now powers all of Vatican City's operations. Italian energy company ACEA completed ...

This tradition got a recent boost. The late Pope Francis' goal of powering the Vatican by 100% solar energy is happening now as Vatican City becomes the first fully powered solar state.

To model what this could look like, he announced that solar panels would be installed on a Vatican-owned property outside Rome, and the power generated from that could supply all of ...

It has long been an exemplar for tackling climate change through its approach to renewable energy. Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal ...

Vatican City is powered by solar. On May 29, 2025, the Vatican City officially transitioned to solar power, marking a significant shift in the European energy landscape.
