

Energy companies, cybersecurity experts and lawmakers warn that U.S. dependence on Chinese inverters that can be manipulated remotely is a mounting security threat.

This follows discovery of rogue communication devices not listed in product documents in some Chinese solar inverters, according to Reuters. The number of devices investigated was also ...

U.S. officials have discovered undisclosed communication devices on the power inverters of some Chinese-manufactured solar panels, Reuters reported today based on anonymous ...

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday. The ...

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to review renewable tech security.

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

The rogue devices, including cellular radios, were discovered in Chinese-made power inverters that are used to connect solar panels and wind turbines to electricity grids across the world, including the UK.

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without sufficient domestic manufacturing options has made ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication...

In this article, we're focusing on the hidden hazards of solar investments. From deceptive sales pitches to illegitimate paperwork, we'll cover five key areas every homeowner should scrutinize:
