

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

Over the past nine months, the suspect devices were found in inverters and batteries from multiple Chinese suppliers by US experts who strip down equipment to check for security issues before they ...

Experts have uncovered secret communication devices hidden in Chinese-made solar power inverters, raising serious alarms about potential sabotage of U.S. infrastructure in the event of ...

Unexplained communication devices have been found inside some Chinese-made inverter devices, according to a Reuters report. The news agency claims US energy officials are ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication...

US energy officials have found unexplained communication equipment inside some Chinese-made inverter devices, according to a report from the Reuters news agency. This morning, ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

U.S. officials have discovered undisclosed communication devices on the power inverters of some Chinese-manufactured solar panels, Reuters reported today based on anonymous ...
