

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

According to the International Renewable Energy Agency (IRENA), in 2023, Europe's solar PV installed reached 285.80 GW, with a growth rate of 23.45% over the previous year.

Overall, the European solar market will continue to boom, driven by its energy transition strategies. In addition to the policies rolled out by the EU, most European countries also introduced ...

An introduction to solar energy and types of solar energy conversion technologies including solar thermal and solar photovoltaics (PV).

Find the most up-to-date statistics about the solar photovoltaic industry in Europe

The latest SolarPower Europe report has indicated who are the top 10 solar PV markets for 2024, showing shifts in growth trends among EU countries. Only half of the top 10 markets ...

The European Electricity Review analyses full-year electricity generation and demand data for 2024 in all EU-27 countries to understand the region's progress in transitioning from fossil ...

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the ...

According to the market survey, 2023 was the best year for solar power for 20 of the 27 EU member states, including 14 countries that installed 1 or more GW. The combined installed ...

Solar energy is a form of renewable energy, in which sunlight is turned into electricity, heat, or other forms of energy we can use. It is a "carbon-free" energy source that, once built, ...

According to new data from Eurostat, renewable energy sources generated 54% of the EU's net electricity in Q2 2025, up from 52.7% year-over-year. The growth came mainly from solar, ...

Home solar panels are rapidly becoming mainstream. We'll help you decide if a home solar panel system is right for you.

The Europe solar PV market size crossed USD 63.1 billion in 2024 and is set to register at a CAGR of 7.1% from 2025 to 2034, due to the growing focus on green energy and net zero initiatives.

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

We provide residential solar, battery storage, and custom solutions for homes, built to last with quality and backed by decades of solar expertise.
