

What are solar-powered radios?

Solar-powered radios are essential tools for emergency preparedness and extreme weather situations. Unlike traditional radios, they rely on solar energy, making them useful when regular power sources fail.

How does a solar powered radio work?

Solar powered radios rely on a small photocell to convert sunlight into electricity. Solar powered radios are often equipped with a rechargeable battery, which stores the energy captured by the photocell for use at night when there is no sunlight. Solar radio is the perfect way for you to be safe and up-to-date in an emergency.

What is a solar crank radio?

Mesqool Solar Crank Radio is a multi-functional, emergency weather alert, and rechargeable solar radio. This solar radio device comes with a hand power generator crank to keep your digital devices well powered. This solar radio also serves a variety of purposes - an emergency flashlight, an SOS alarm, and a power bank.

How do I choose a solar-powered radio?

Look for a radio with a USB outlet; that way, you'll always have a spare battery for your smartphone, camera, or GPS. Another common bonus feature, an LED flashlight is often integrated into solar-powered radios. It's an excellent way to add a backup light if your headlamp goes out. The rate of solar charging is variable based on sun conditions.
