

The first two projects, Stor"Sun 1 (SS1) and Stor"Sun 2 (SS2), with a combined investment of around Rs. 4.5 billion, began construction in June 2025, marking a significant milestone in ...

Discover how a new 10MW solar plant in Moka, Mauritius, is advancing the nation's 60% renewable energy goal with innovative battery storage and green hydrogen production.

Recognising the suitability of rooftop solar PV for Mauritius as a Small Island Developing State (SIDS), the socio-economic impact and climate benefits, ADFD and IRENA teams approved CEB's proposal ...

While renewable energy remains central to our vision, meeting growing energy demands requires firm power generation through conventional means. To address this, we are pursuing projects that ensure ...

Energy Sector in Mauritius Renewable Energy - Aim o Decarbonize energy sector to achieve 60% of renewable energy by 2030 along with the phasing out of the use of coal by the same year.

The Central Electricity Board (CEB), under the Ministry of Energy and Public Utilities of Mauritius, has made significant strides in scaling up the deployment of solar (photovoltaics) PV ...

Thus, the future 100 % RE system for Mauritius would rely on a backbone of solar PV generation working in tandem with lithium-ion BESS, supplemented by offshore wind and integrating ...

By combining small-scale rooftop systems with larger solar parks, Mauritius is creating a more resilient and sustainable energy system. Mauritius's solar journey is more than a technical ...

A solar plant that will provide electricity to thousands of homes a year in Mauritius has been inaugurated. This is the first in a number of solar energy driven projects in the country set to ...

The objective is to gradually replace coal with local renewable sources and achieve a planned, irreversible transition to a cleaner energy mix by 2035, supported by national awareness ...
