

The combination of the shift to renewable energy and the lack of grid stability in several Southeast Asian nations indicates the need for storage technologies, a need which is starting to be ...

Vena Energy has signed a battery storage supply agreement with CATL for a project which would export renewable energy from Indonesia to Singapore. The World Bank will invest in a ...

This event will unite over 30,000 visitors from 60+ countries and 1,400+ major brands. Together, we'll spotlight renewable energy programs, Thailand's ambitious journey to Net Zero, and the ...

This case study explores the potential of pumped hydroelectric energy storage (PHES) as a key solution to support Southeast Asia's renewable energy transition.

Southeast Asia can look to Australia and Japan as examples of how to promote the adoption of energy storage systems (and, once the necessary regulations are in place, the potential speed of the rollout).

The second chapter describes the IEA scenario projections for Southeast Asia to 2050 across all fuels and technologies, based on the scenarios in the IEA's World Energy Outlook, and ...

The Future Energy Storage & System Integration Alliance (FESSIA) is a regional alliance born out of the need to ensure ASEAN's energy systems remain stable and resilient, enabling large-scale ...

South East Asia is a diverse, resource-rich region where fossil fuels remain dominant. However, renewables are gaining significant momentum through policy reforms and investment as climate ...

W&#228;rtil&#228; has delivered a number of projects in the region, including Singa-pore's first-ever pilot grid-scale battery energy storage system (BESS) and several large-scale projects in the Philippines, building on ...

To address Southeast Asia's diverse operating conditions, Hoenergy developed its Multi-Energy Microgrid Solution, combining solar, wind, diesel generation, and energy storage under a ...
