

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry solutions, ...

The Syrian government and the Saudi energy group ACWA Power have signed a Joint Development Agreement (JDA) to explore the development of approximately 2.5 GW of solar and wind ...

According to Power Technology, Syria recently reached a \$7 billion agreement with a consortium consisting of Qatar, Turkey and the United States to develop a 5 GW gas and solar project, including four gas-fired power ...

The agreement establishes a framework to perform detailed technical and commercial studies on existing power plants and the national grid, and to evaluate, develop, and implement a pipeline of power ...

In the informative video below, Dr. Shadi Kalash highlights priority areas for detailed analysis and provides actionable recommendations, such as securing funding for wind data measurements and initiating ...

By combining solar, wind, and storage, the agreement signals a shift toward a more sustainable and resilient energy system for the country. ACWA Power and Syria's Ministry of Energy sign JDA to develop 2.5GW ...

Syria's Energy Ministry and Saudi Arabia's ACWA Power signed a joint development agreement to study the development of about 2.5 gigawatts (GW) of solar and wind power, along with energy storage ...

Round 3 projects consisting of 150 MW of solar and 50 MW of wind power, including a storage option, are being carried out in Ma'an and are planned to be completed in 2020.

Syria partners with ACWA Power to develop 2.5 GW solar and wind projects with energy storage and a national training centre.

We look forward to working in Syria to transform studies into projects that add real capacity, strengthen the grid, and create skilled jobs." Additionally, the partnership will explore grid-scale storage ...
