

# The United States restarts solar power stations

Despite the Trump administration's wide-ranging attacks on renewables like wind and solar power, the clean-energy industry is on pace for record growth this year, according to ...

Following the expiration of the pause on March 21, the Interior Department's Bureau of Land Management (BLM) reportedly resumed permitting for solar, storage, and geothermal ...

In the first half of 2025, solar accounted for 82% of all new power added to the grid, with most of that capacity installed in Trump-voting states, such as Texas, Florida, and Arkansas.

The extra layer of scrutiny for wind and solar contrasts with actions by the Trump administration to make it easier and cheaper for companies to produce oil, coal, gas and nuclear power.

Last week, more than 100 solar companies penned a letter to Congressional leaders urging them to revoke the Interior Department policy, which they said amounted to a near ...

Since taking office, the Trump Administration has paused permits on all new wind and solar projects on public land, both onshore and offshore. New wind and solar power installations, and...

The Trump administration's cancellation of the largest solar project in the United States has sparked confusion and concern among Republicans and Democrats alike.

With the news of Corning's new ingot and wafer facility coming online in Q3, the United States now has the capacity to produce every major component of the solar supply chain.

U.S. President Donald Trump has used his second term in the White House to stymie development of wind and solar energy facilities that were a cornerstone of former President Joe ...

At least 35 commercial-scale solar power projects that were under at least preliminary review by BLM when President Donald Trump took office still await action.
