

Today we're celebrating the birthday of our founder and captain--the visionary who built Cape May Whale Watcher with grit, heart, and an unwavering love for the ocean. His leadership, ...

Fast forward to 1954: scientists at Bell Laboratories in the United States created the first practical photovoltaic (PV) cell using silicon. This silicon solar cell was capable of converting sunlight ...

To appreciate its significance, it's important to understand the basic concepts behind solar panels, how they work, and the key figures involved in their creation. This section will break ...

At the young age of 19, working in his father's lab, Becquerel discovered the photovoltaic effect. He observed that shining light on certain materials generated electricity. This groundbreaking ...

1839: At the age of 19, Frenchman Alexandre-Edmond Becquerel creates the world's first photovoltaic cell in his father's laboratory. 1 His studies of light and electricity inspire later...

ISW-WEW (Women Empowering Women) founder and chair Prof. Snehalata Kadam shared an inspiring introduction on why this platform was launched and the vision and mission ...

Founder of @elixrhealthclubs Richard Chew has written an autobiography to be released at the end of Feb? Details to follow along with a Podcast episode on Mindfulbiz Podcast.

Gabby Asare Otchere-Darko, Founder and Executive Chairman of the Africa Prosperity Network, has arrived at the Africa Prosperity Dialogues 2026, happening now at the Accra ...

Therefore, some consider the true invention of solar panels to be ...

In 1884, Charles Fritts, a New York-based inventor, embarked on a groundbreaking experiment that would lay the foundation for the future of solar energy. Using selenium, a non-metal ...

Therefore, some consider the true invention of solar panels to be tied to Daryl Chapin, Calvin Fuller, and Gerald Pearson's creation of the silicon photovoltaic (PV) cell at Bell Labs in 1954.

In 1883, New York inventor Charles Fritts created the first practical working solar cell by coating selenium wafers with an extremely thin layer of gold--a device that could generate consistent ...

While experimenting with metal electrodes and an acidic solution, nineteen-year-old French physicist Alexandre Edmond Becquerel creates the first solar cell. This solar cell was known as a photovoltaic ...

Charles Fritts installed the first solar panels on New York City rooftop in 1884. Courtesy of John Perlin. Take a light step back to 1883 when New York inventor Charles Fritts created the first...

Welcome to the Cathedral Bishop Darnell Gooch Jr., Pastor/Founder "Super Bowl Sunday" Sunday, February 8, 2026 Giving Options: Givelify: Cathedral of Praise Church of Memphis Cash ...
