

The wireless solar container communication station battery cannot be replaced

Does the wireless solar sync transmitter have a battery?

The battery in the Wireless Solar Sync Transmitter is designed to operate for the life of the sensor by providing a sealed, maintenance-free design. The transmitter is available as a replacement part (WSS-TR). Should you need to change the transmitter, the receiver will have to learn the new transmitter address. [Learn more](#)

How do I replace the wireless solar sync transmitter?

Press and hold the spindle for 10 seconds. If the LED does not flash, the transmitter needs to be replaced. The Wireless Solar Sync Transmitter replacement part number is WSS-TR. Warranty information can be found [here](#).

Why is my wireless solar sync transmitter not working?

If the LED will not readdress, check the status light on the bottom on the transmitter. Press and hold the spindle for 10 seconds. If the LED does not flash, the transmitter needs to be replaced. The Wireless Solar Sync Transmitter replacement part number is WSS-TR.

Is the battery inside the transmitter replaceable?

IMPORTANT: The battery inside the transmitter is NOT replaceable. It is sealed with epoxy, which allows it to remain free of any future corrosion. To perform a battery test on the transmitter, you must view the receiver status to check if there is communication between the transmitter and receiver.
