How to choose a wattage inverter?

1. Firstly, Size the Right Power Output. Inverters will be rated by a wattage value. According to this code, if there were 1000 Watt air conditioning and 800 Watt fridge; These electronics would be counted as 1800 Watts then require an inverter over 1800W. In this case, Leaptrend 2000W and 3000W inverters can perfectly cover your power needs.

Can an inverter work with a 12V battery bank?

For example, an inverter with 12V DC input can work with a 12V battery bank. 3. Thirdly, Keep a Mind on the Installation Space. Sizing the place where you design to install the inverter, and checking for good ventilation and no fire hazards.
