

Bako Motors, a Tunisian startup, is looking to jump on the EV trend, while tapping into one of Africa's greatest natural resources -- sunshine. Its compact cars and cargo vans have solar...

Ifrisol, based in Tunisia, has been manufacturing its solar panels since 2013, with hundreds of installations around the world. The company expanded its European operations and project pipeline...

Tunisia is accelerating its energy transition by awarding 4 solar photovoltaic projects totaling 498 MW to reduce import dependency and promote renewable energy. Faced with growing energy...

The Kairouan solar plant is more than just a power station; it's the beginning of a journey that could see Tunisia exporting clean energy and know-how across the Mediterranean and beyond.

Average global horizontal irradiation is between 4.2 kWh per m²; per day in the north-west of Tunisia and 5.8 kWh per m²; pd in the extreme south. Given these favourable conditions, the productivity of solar photovoltaic ...

Tunisia has announced the winners of tenders for over 500MW of solar capacity, part of a series of tenders to install 1.7GW of new renewable power capacity. The contracts were awarded by the...

In 2009, the Tunisian government adopted "Plan Solaire Tunisien" or Tunisia Solar Plan to achieve 4.7 GW of renewable energy capacity by 2030 which includes the use of solar photovoltaic systems, solar ...

The Tunisian government has granted licenses to four PV projects with a combined capacity of 500 MW. The selected developers are Qair International, Voltalia, Toyota Tsusho and Scatec.

The solar plant is poised to have a significant positive impact on Tunisia's energy sector, which has faced growing challenges in recent years. The nation has been struggling to meet a rising electricity ...

Tunisia has awarded four new solar power projects to international companies for the production of 500 megawatts of electricity as part of a drive to expand the share of renewable energy in its mix.
