

The Vientiane Ireland Energy Storage Power Station - a 500MW/2000MWh lithium iron phosphate (LFP) facility operational since Q4 2024 - demonstrates how modern battery technology can solve this crisis.

The Vientiane park's 200MW/800MWh battery energy storage system (BESS) is on track to smash that record. Early tests show 94% round-trip efficiency - that's like losing only one french ...

Marubeni Green Power Vietnam, a wholly owned subsidiary of Marubeni--one of Japan's largest general trading "s?g? sh?sha" companies--partnered with Vietnamese counterpart VinGroup ...

Battery energy storage systems, or BESS, are a type of energy storage solution that can provide backup power for microgrids and assist in load leveling and grid support.

The Australian Energy Regulator (AER) has said that a delay in new renewable energy and energy storage capacity coming online on the National Electricity Market (NEM) in 2023-24 means the grid ...

Yiwei lithium energy announced that the company and its subsidiaries plan to invest in the construction of a new energy power storage battery industrial park with an annual output of ...

Laos is accelerating its renewable energy transition, and the Vientiane Energy Storage Project stands as a pivotal initiative. With bidding now open, global investors and engineering firms have a unique ...

Battery storage is an essential enabler of renewable-energy generation, helping alternatives make a steady contribution to the world's energy needs despite the inherently intermittent character of the ...

Thermal energy storage is a key technology for addressing the challenge of fluctuating renewable energy generation and waste heat availability, and for alleviating the mismatch between energy ...

The dynamic nature of our Battery Energy Storage allows it to offer a range of improvements and benefits, adapting to the specific energy management priorities of each client.
