

All Archweb drawings are of excellent graphic quality, designed by us with care and professionalism, probably the best you can find on the net. We remain at your disposal for any information request.

The structural properties of the tower (such as stiffness and natural frequency) can significantly affect the performance of the wind turbine, and the cost of the tower is a considerable...

This an actual full scale digital prototype of a wind turbine tower made of welded steel parts. Excel table for parametrization included.

Design of these components and the nature of the welding connection has an impact on the load capacity of the tower tubing, in particular in the fatigue limit state (FLS)! Therefore, specification as ...

Conceptual illustration of a modern wind tower featuring a tall skyscraper design with integrated wind turbines. The structure includes multiple glass-facade sections and green terraces on various levels.
