

China's first offshore wind power project that entirely uses ultra-large-capacity wind turbines achieved full-capacity grid-connected power generation on Thursday in Zhangzhou, Fujian province.

A 20-megawatt offshore wind turbine unit was put into operation on the waters of southern Fujian on Thursday, and was successfully connected to the grid for power generation. (Xinhua/Lin ...

On December 14, the CHN Energy 200 MW wind power project in Wuqia County, Xinjiang Uyghur Autonomous Region, successfully achieved full capacity grid connection. This ...

The world's first 20-megawatt offshore wind turbine has been successfully commissioned and connected to the power grid in waters off southeast China's Fujian ...

Recently, Yucheng Weihe Phase II 50MW wind power project successfully completed full-capacity grid-connected power generation. The project has a total investment of 330 million yuan, ...

The ability of wind generation systems to support grid frequency is closely related to the synchronization mechanism. The conventional synchronization of wind generation systems with the power grid using ...

The Huadian Yuhuan No 1 offshore wind farm (south zone) in Taizhou, Zhejiang province commenced grid-connected power generation on June 3, marking the completion and successful operation of the ...

e capacity and grid-connected scale of individual units are constantly growing. The development trend of wind power generation is becoming stro ge, placing higher demands on grid ...

An object shaped like an inflatable airship was seen floating over Yibin, Sichuan Province in Southwest China earlier this month. Turns out, it wasn't some unidentified object. In fact, it was an ...

The world's first 20-megawatt offshore wind turbine has been successfully commissioned and connected to the power grid in waters off southeast China's Fujian Province, according to China ...
