

Guided by ZESCO, similar solar power initiatives are on the horizon in Kasama, Choma, Chipata, Serenje, Siavonga, and Kafue Gorge, signalling a nationwide push to harness Zambia's ...

The project, billed as the largest grid-connected solar facility in Zambia and the biggest of its kind in sub-Saharan Africa outside South Africa, is now ready to be commissioned.

Located in the Chisamba district, this project is Zambia's state-owned power company ZESCO's first solar initiative. Apart from the 100MW solar station, the project also features a ...

The plant utilizes bifacial solar panels, a technology that captures light from both sides of the panel, increasing efficiency by 5 to 10 percent compared to conventional models.

Zambia has officially signed a US\$100 million agreement for one of the largest standalone solar energy projects in Sub-Saharan Africa, outside South Africa--marking a major step ...

The Chisamba Solar Power Plant is a 100 megawatt (MW) grid-connected photovoltaic (PV) solar power station in Chisamba District, Central Province, Zambia. Commissioned in June 2025, the project ...

Construction of the first phase began in July 2024. A second phase, involving an additional 100 MW solar plant, is expected to commence soon. The project encompasses a 100-MW solar ...

Zambia's state-owned power company ZESCO Limited announced that it has completed the construction of the 100-MW Chisamba solar farm, adding that it is already planning to double its ...

On May 20, the 100 MW emergency solar photovoltaic project in Kabwe, Zambia, was successfully connected to the national grid.

The plant's first phase comprises some 182,000 bifacial solar panels--capable of absorbing sunlight from both sides--making it Zambia's most ambitious solar deployment yet.
